

global Restaurant Online Ordering

Attract new customers and increase revenue.

Our fully-integrated solution allows merchants to accept online orders directly on their POS. A user friendly interface styled to fit your brand enables customers to order from anywhere. Mobile Ordering is part of Global Restaurant's powerful features, at no additional cost. Your customers can order directly from your site to eliminate paying middlemen on every order. The solution is efficient and cost effective, with no additional training required.

Key Merchant Benefits

- Expand your online presence
- Setup is simple so you can be taking orders in no time
- Smartphone and tablet friendly
- Styled to fit your brand
- Location selector for multi-store
- Separate catering URL
- Fully integrated into Global Restaurant POS

The world of online ordering is evolving at a fast pace. These days, people are using smartphones and tablets much more than desktops and laptops to place orders. This is why responsive, mobile web design is essential for your restaurant. Global Restaurant Online Ordering works great on both Android and iPhone devices, ensuring no customer is left out.

30% of users will abandon a purchase if the online experience isn't mobile friendly
